

WEB-APP POSTERS

Starting the Conversation

You can use the handouts on the next few pages to normalize conversations about IPV in your organization. These can be printed out and shared with staff, clients and providers in your setting.

You can even print these posters out and place them in private areas in your building (e.g. waiting areas, washrooms, exam rooms, x-rays rooms). Anyone who wants to view the apps can do so immediately, through the QR code on the posters.

We have included 3 posters:

1. **WITHWomen** web-app for screening for IPV and providing resources
2. **Pathways** web-app for a danger assessment, safety planning, and resources
3. **PROMiSE** web-app for assessing danger and improving safety during a public health emergency (e.g. COVID-19)

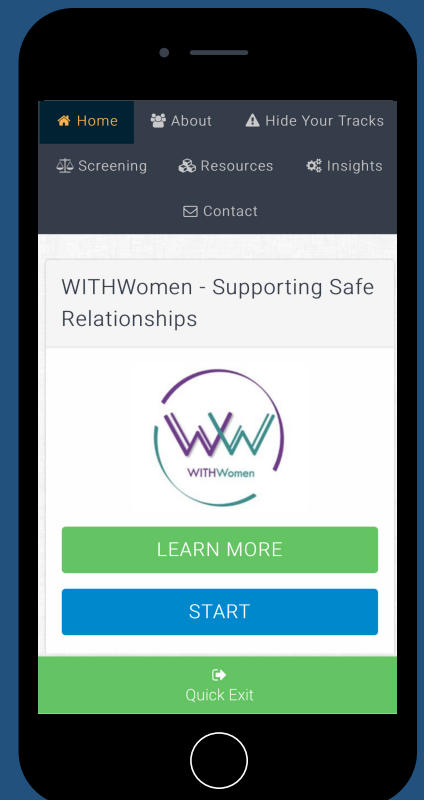

Has your relationship ever felt unsafe?

Take 1 minute to check your safety

**WITHWomen is a web-app
that can help you:**

- 1 Check your safety
- 2 Get support
- 3 Learn about relationships
- 4 Connect to safety planning tools

It's free, anonymous, and secure
(no download required)
